### Volume 5, Number 3, May 2015

#### • **Electronics and Communication Engineering**

Analysis of Queue Performance of  $n$ GBN-ARQ and Its Improved Protocol Based on TDD Channel..... 158  
*Suoping Li, Jun Yu, and Yongkui Tie*

A Pre-Interleaver and Error Control Based Selective Mapping Method for PMEPR Reduction in MC-CDMA  
.....165  
*Sajjad A. Memon, Zhe Chen, and Fuliang Yin*

Single Link Performance of UWB Systems Based on Cognitive Radio in the AWGN UWB Channel.....172  
*Shuo Lin*

Assessment of Electromagnetic Radiation with Respect to Base Station Types..... 176  
*Levent Seyfi*

Artifacts Removal of EEG Signals Using Nonlinear Adaptive Autoregressive..... 180  
*Arjon Turnip and Iwan R. Setiawan*

MacWilliams Identities of Linear Codes over a Matrix Ring with Respect to Rosenbloom-Tsfasman Metric  
.....184  
*Dandan Wang, Minjia Shi, and Yan Liu*

#### • **Control Engineering and Embedded Systems**

Study on Robust Cascaded Time-Space Adaptive Reverberation Suppressing Method.....189  
*Ma Quli, Zhan Haoke, Yuan Bingcheng, and Zhu Xi*

The Design of Fuzzy Adaptive PID Controller of Two-Wheeled Self-Balancing Robot.....193  
*Congying Qiu and Yibin Huang*

Robust Control of Two Link Rigid Manipulator.....198  
*Pawan Singh Yadav and Narinder Singh*

Runtime Comparison of CPU and GPU Using Portable Programming Models.....204  
*Franz Wiesinger, Florian Nairz, and Michael Bogner*

#### • **Data Mining and e-Learning**

MAHIR System: Unsupervised Segmentation for Malay Spoken Broadcast News Stories.....211  
*Zainab Ali Khalaf and Tan Tien Ping*

Learning at Your Own Pace: M-Learning Solution for School Students.....216  
*Uma Srithar and Dhivya Selvaraj*

An MCA Based Method for API Association Extraction for PE Malware Categorization.....225

*Mohamed Belaoued and Smaine Mazouzi*

Percolation Approach to Digital Comparative Holography via Optical Flow Investigation.....232

*M. Hossein Ahmadzadegan and Tapio Fabritius*
