

International Journal of Information and Electronics Engineering

CONTENTS

Volume 6, Number 4, July 2016

- **Electronics and Communication Engineering**

An Overview of Pilot Decontamination Methods in TDD Massive MIMO Systems.....214
Sajjad Ali, Zhe Chen, and Fuliang Yin

Design of Substrate Integrated Waveguide Multi-band Slots Array Antennas.....221
Keltouma Nouri, Tayeb Habib Chawki Bouazza, Boubakar Seddik Bouazza, Mehdi Damou, Kada Becharef, and Salima Seghier

Differential-Mode Branch-Line Directional Couplers.....226
J. Sorocki, I. Piekarczyk, K. Staszek, P. Kaminski, K. Wincza, and S. Gruszczynski

Design and Optimization of a Microstrip Bandpass Filter for Ultra Wideband (UWB) Wireless Communication
.....230
S. Seghier, N. Benabdallah, N. Benahmed, and K. Nouri

Modified Root MUSIC for Adjacent Coherent Sources.....234
Hassan Mohamed El-Kamchouchi and Ahmed Samir El-Torgoman

- **Computer and Network Engineering**

Distributed Reconfiguration Algorithm for Self-Repairing in Cell-Based Architecture.....238
Chanin Wongyai and Pradondet Nilagupta

Exploiting Online Social Network Structural Properties for Information Spreading.....247
Edward Yellakuor Baagyere, Zhen Qin, Hu Xiong, and Qin Zhiguang

Context Selection Optimization Using Quality of Context for Context Refinement in Internet of Things.....256
Ntalasha Derrick, Li Renfa, and Wang Yongheng

Review Social Network Analysis and Mining: Link Prediction.....265
Kalum P. Udagepola and Fatima Chiroma

- **Bioinformatics**

A *k*NN Approach for ECG Signal Quality Classification.....269
Tanatorn Tanantong
